

The ExoDx™ Prostate Test Benefitting Veterans, Urologists, and VA Medical Centers

Studies have identified veterans as a higher risk group for prostate cancer than the civilian population. Given this higher risk, prostate cancer screening is an important factor not to be overlooked when managing veteran health.

Benefits of the ExoDx™ Prostate Test

Actionable Effortless Results

The ExoDx Prostate Test provides a result above or below the cut point of 15.6. Over 15.6 indicates increased risk of high-grade prostate cancer. A recent clinical study showed 30% more high-grade prostate cancer was identified compared to standard of care (SOC) alone. Easy to read results help veterans and their doctors decide whether having a biopsy is the right choice.

doi.org/10.1038/s41391-020-0237-z

Noninvasive Flexible Sample Collection Options

Only 15 mL of urine sample is required for testing with both In-Office and At-Home Collection Kits.

Impactful Scientifically Backed by Numerous Peer-Reviewed Studies

91.3% NPV (Negative Predictive Value) and 92% Sensitivity for the ExoDx Prostate Test to assess a patient's risk for high-grade prostate cancer.

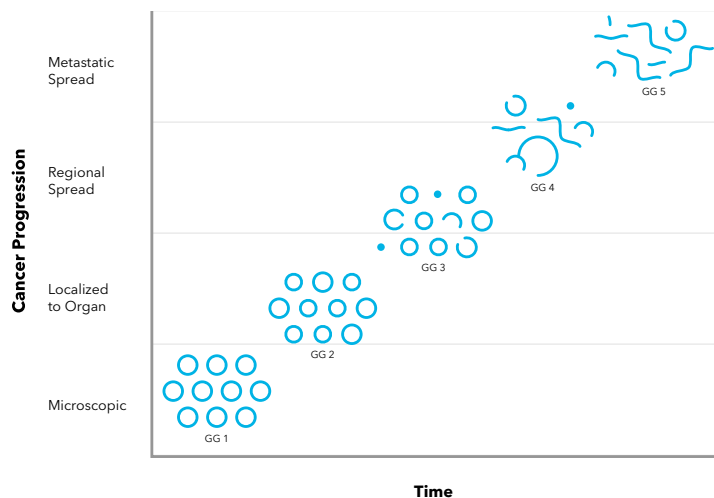

doi.org/10.1001/jamaoncol.2016.0097

Exosome Advantage Independent Informative Data Point

Exosomes are isolated from urine, which contains an elevated level of prostate-specific exosomes. They are analyzed and entered into a proprietary algorithm to indicate a score validated to discriminate between low-grade and clinically significant prostate cancer.

Benefits of Identifying High Grade Prostate Cancer Early

- Identify patients at highest risk AND avoid overtreatment of low-risk prostate cancer
- Reduce additional cost and time
- Allow veterans in rural areas the benefit of at-home collection options
- Use a biomarker option to improve risk assessments using a noninvasive urine test to help determine which patients should proceed to MRI and/or biopsy

Veteran Prostate Cancer Journey	The ExoDx Prostate Test Path
Routine bloodwork returns elevated PSA score, potential DRE, and schedules follow-up	Receives elevated PSA score and provides urine sample for The ExoDx Prostate Test immediately in-CBOC or is sent an At-Home Collection Kit
Comes back to facility to discuss biopsy and possibly schedule procedure	Test results returned within 3-5 days
Potential MRI	Potential MRI
Veteran may be hesitant to follow through with biopsy due to multiple factors including potential complications when the procedure may not be necessary.	Shared decision to biopsy based on risk assessment, including the ExoDx Prostate test result (independent of all other clinical factors).

How to Order with the GSA Award

1. Contact Exosome Diagnostics at exosomedx.info@bio-techne.com, or your local rep.
2. The ExoDx team will assist in new account set-up and establishing the VAMC with temporary or permanent payment methods.
3. Healthcare providers can order the ExoDx Prostate Test with ease through our Portal, EMR integrations, or paper-based.
